Office Action Summary

Art Unit: 1714

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 6-11 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. See page 3, lines 6-12, page 4, lines 13-21, page 6, lines 25-37.

3. Claims 6-11 rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The non-ionic, non fluorine-containing surfactant is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). See page 3, lines 6-12, page 4, lines 13-21, page 6, lines 25-37.

4. Applicants' invention is an aqueous dispersion of a polyvinylidene fluoride polymer, where said polymer has a particle size of no more than 200 nm, using a fluorine containing surfactant and a non-fluorine containing surfactant. That invention has been patented already. There is no description in the instant specification of a process yielding the polymer with the claimed particle size using the fluorine containing surfactant alone. If applicants believe that the examiner's knowledge of the English language is insufficient to understand the instant specification, they may

Art Unit: 1714

request an examiner who is a native English speaker. If there has been a new discovery, enabling applicants to manufacture the inventive polymer without the non-fluorine containing surfactant, they should file a continuation-in-part application, with new data. Under the present circumstances however, the rejection is maintained.

5. Claims 12-14 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the specification of "an average particle size of not more than 320.1 nm".

6. Claims 15-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the specification of "an average particle size of not more than 196.3 nm".

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

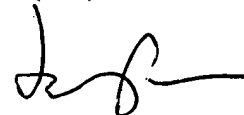

Art Unit: 1714

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (703) 308-2460. The examiner can normally be reached on Tuesday through Friday from 7:00 a.m. to 5:30 p.m.
